Mississauga, ON, Can L5T 0A3

Dear Tara Sable,

Despite our efforts to control costs, the raw material used to manufacturing our products continues to rise dramatically. As we purchase the raw material necessary to make the PMMA we sell to you, we are being forced to pay more to secure it and therefore must pass that increase on to our customers.

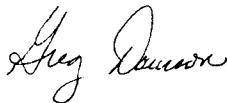

Effective with shipments on or after May 1, 2011, Altuglas International will increase prices by \$.12/lb on all Plexiglas® V-Grade resins, and \$.15/lb on Plexiglas® Impact products and Solarkote® acrylic resins.

Your local Altuglas sales representative will contact you to answer any questions you may have, or feel free to contact me at 847-778-3994.

Standard terms will remain in effect at Net 30 days to creditworthy customers.

Thank you for your continuing support of Plexiglas® resins, the most recognized brand name for acrylics.

Very truly yours,

Gregory D. Dawson
Sales Director - Resins
